

Types of Energy Concept Map

Name _____

Hour _____

Date _____

Physical Science

Mr. Pickett

Read the information on the website “Kinds of Energy” at

<http://www.eschooltoday.com/energy/kinds-of-energy/all-about-energy.html>

-or- find the link at my website

-or- google search for “kinds of energy eSchooltoday”

After reading the information on the site about kinds of energy, list and define the terms that you choose to include on your map. Do this on your own paper and staple it to this sheet.

Next, create a concept map using google drawings or lucidchart.

Your concept map should include:

- Cells or bubbles that include the important terms/concepts
- Linking lines to show the concepts that are most related
- Linking words/phrases that explain the relationship
- Images
- A clear organizational structure - either hierarchical (main idea at top) or spider (main idea in center)
