Experiment 1

The purpose of the first experiment was to

(Describe what we did)

The data shows that ...

INSERT YOUR CHART HERE

Experiment 2

In 1-2 paragraphs, describe what you chose to test and what happened. Be as detailed as possible in describing the variables that you changed and the result of these tests. Your results should be described in terms of the voltage produced for each test. Include drawings of the shapes you used. Use complete sentences and proper conventions in your writing. Create a chart that shows the results of your testing.
